SUMMARY

Middle+ Fullstack Developer with 6 years of professional experience delivering enterprise web, mobile, and cross-platform systems. Strong in TypeScript, React, Next.js, Node.js, NestJS, PostgreSQL, and system design, with hands-on ownership from feature development through debugging and delivery. Currently at VIETIS building Japanese education and ERP accounting products; prior work includes Viettel and Naver projects and mentoring 8+ engineers.

WORK EXPERIENCE

Fullstack Developer | VIETIS | Mar 2026 - Present

Japanese School Management & OCR Assessment Platform

- **Product scope:** Japanese school-management platform with student and teacher administration plus OCR-based exam scanning and scoring.
- **Feature delivery:** Developed student and teacher management features using Next.js frontend and NestJS backend.
- **OCR scoring:** Fixed exam scoring and scan-processing issues, improving the reliability of OCR assessment results.
- **Identity & access:** Investigated and resolved Keycloak authentication and authorization issues across the application workflow.
- **Tech stack:** Next.js, React, TypeScript, NestJS, OCR, Keycloak.

Enterprise ERP Accounting & Reporting Platform

- **Product scope:** Enterprise ERP accounting platform supporting business-rule-driven reporting and operational workflows.
- **Reporting:** Owned report features and translated accounting requirements into practical reporting workflows.
- **File workflows:** Implemented export and file-generation flows based on business rules and operational data.
- **Tech stack:** TanStack React frontend, TypeScript, and C# backend.

Software Engineer / Team Leader | Blameo (Outsourcing for Viettel Group) | Jun 2022 - Present

- **Leadership:** Led and mentored 8 engineers; built technical interview and mentorship practices for team growth.
- **Team development:** Defined engineering expectations and supported interns and developers through structured feedback and coaching.
- **Architecture:** Refactored legacy Node.js services, reducing API latency by 50% and improving peak-load reliability.
- **Product delivery:** Built KPI management and Viettel Cloud features with React, TypeScript, and Node.js; introduced ESLint and Git flow standards.

Software Engineer | CMC Global | Oct 2021 - Jun 2022

- **Naver Cloud Meeting:** Engineered video conferencing across Vue.js web, Electron desktop, and React Native mobile.
- **RTC & quality:** Implemented media synchronization across devices and bandwidths; contributed to architecture and code reviews.

Frontend Developer | NTQ Solution | Oct 2020 - Oct 2021

- **Low-code platform:** Built core features for a React Native app-generation platform focused on automation and dynamic functionality.
- **GoPass e-learning:** Developed exam and e-learning flows with intuitive interfaces and smooth interactive experiences.

SKILLS

- **Fullstack:** TypeScript, JavaScript, React, Next.js, Node.js (NestJS/Express), React Native, Vue.js, Electron.js.
- **Backend & Data:** PostgreSQL, SQLite, Realm DB, Keycloak, OCR assessment workflows.
- **Delivery:** Docker, Jenkins, GitLab CI/CD, GitHub Actions, Nginx, AWS, Linux/Ubuntu.
- **Leadership:** System Architecture, Team Mentoring, Technical Interviewing, Agile/Scrum, CI/CD design.

TITLES AND AWARDS

May 2023 Employee of the Year - Blameo Company
